

# Statistics and forecast

This is quarterly edition of statistics and forecasts for the Wind Power Market, covering data from turbine manufacturers and wind power developers acting on the Swedish market (estimated coverage is 100 percent respectively 95 percent of the total Swedish market)

Q2 2017

Svensk Vindenergi – Swedish Wind Energy Association, SWEA

# The statistics and forecast

- **The statistics** are based on the order books of the turbine manufacturers and project portfolios of the wind power developers presented at aggregated level
- **The forecast** consists of three future scenarios (low, base, high). They are based on assumptions regarding which projects will be realized - considering today's market situation and the future's.
- **Low case:** Only projects where turbine contracts (firm and unconditional) have been signed will be realized. In this scenario no further investment decisions are made, hence this scenario defines the lower limit of wind power growth in Sweden.
- **Base case:** Projects with signed turbine contracts, approximately 10 percent of permitted projects and 5 percent of projects under permission process will be realized. This is the most realistic scenario and is the official forecast.
- **High case:** Projects with signed turbine contracts, around 15 percent of permitted projects and 10 percent of projects under permission process will be realized. This scenario may be relevant in circumstances leading to higher electricity and green certificate prices and sets the ceiling for growth of wind power in Sweden.

# Installations in 2017

## Total by the end of 2016

Turbines: 3 378

Capacity: 6 495 MW

Actual production: 15,4 TWh \*

Annual production (estimated): 16,7 TWh \*\*

## Added capacity in 2017 (forecast)

1st quarter: 23,1 MW

2nd quarter: 0,0 MW

3rd quarter: 171,5 MW

4th quarter: 31,9 MW

---

**Total: 226,5 MW**

## Total by the end of 2017 (forecast)

Turbines: 3 452

Capacity: 6 721 MW

Actual production: 17,3 TWh \*

Annual production (estimated): 17,4 TWh \*\*

*\* Actual production is the real production and depends on wind conditions and when installations are made during the year.*

*\*\* Estimated annual production is the annual production the turbines are expected to produce when in operation during a whole year with normal wind conditions.*

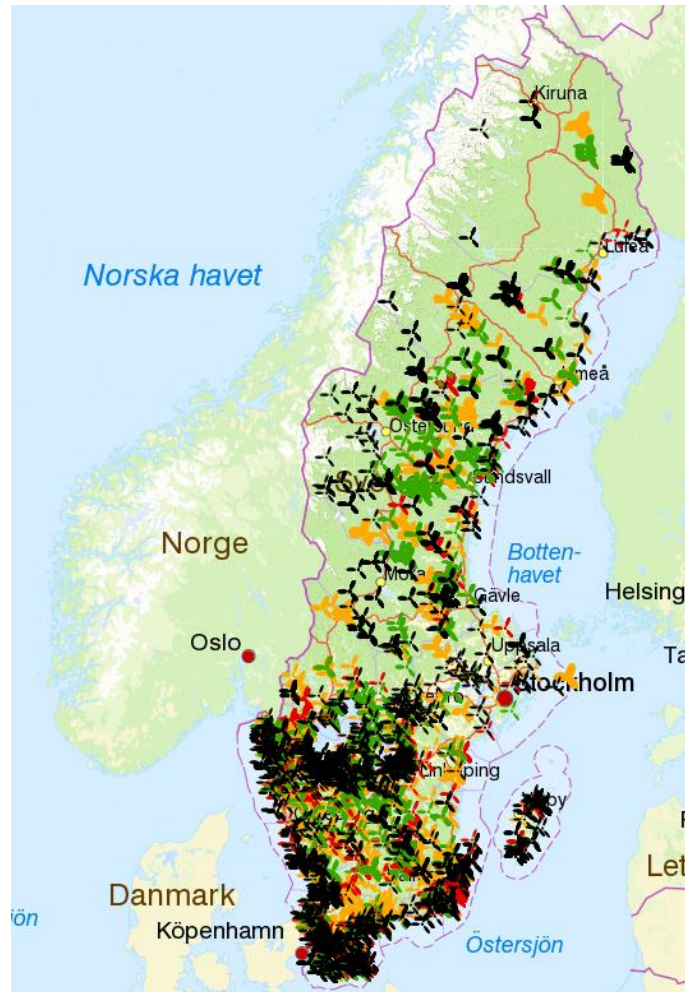

# Project portfolio, status by 2017-06-26

	<b>Onshore</b>	<b>Offshore</b>	<b>Total</b>	<i>Change Q1</i>
<b>In operation</b>				
Windturbines	3 313	74	3 387	( - )
Capacity (MW)	6 328	190	6 518	( - )
<b>* Under construction</b>	<b>Onshore</b>	<b>Offshore</b>	<b>Total</b>	
Windturbines	246		246	(+92)
Capacity (MW)	751		751	(+232)
<b>** Permitted</b>	<b>Onshore</b>	<b>Offshore</b>	<b>Total</b>	
Windturbines	3 069	503	3 572	
Capacity (MW)	9 995	2 267	12 262	
<b>** In permission process</b>	<b>Onshore</b>	<b>Offshore</b>	<b>Total</b>	
Windturbines	2 590	275	2 865	
Capacity (MW)	7 885	925	8 810	

\* Firm and unconditional turbine order based on investment decisions

\*\* Estimations

# New turbine contracts (firm and binding)

\* Figures from all turbine manufacturers acting on the Swedish market

# Order books

Time plan according to turbine manufacturers for wind power installations during year (MW) \*

2016	2017 Q1	2017 Q2	2017 Q3	2017 Q4	2017 (Tot)	2018	2019
468	23	0	172	32	227	468	80

\* Figures from all turbine manufacturers acting on the Swedish market

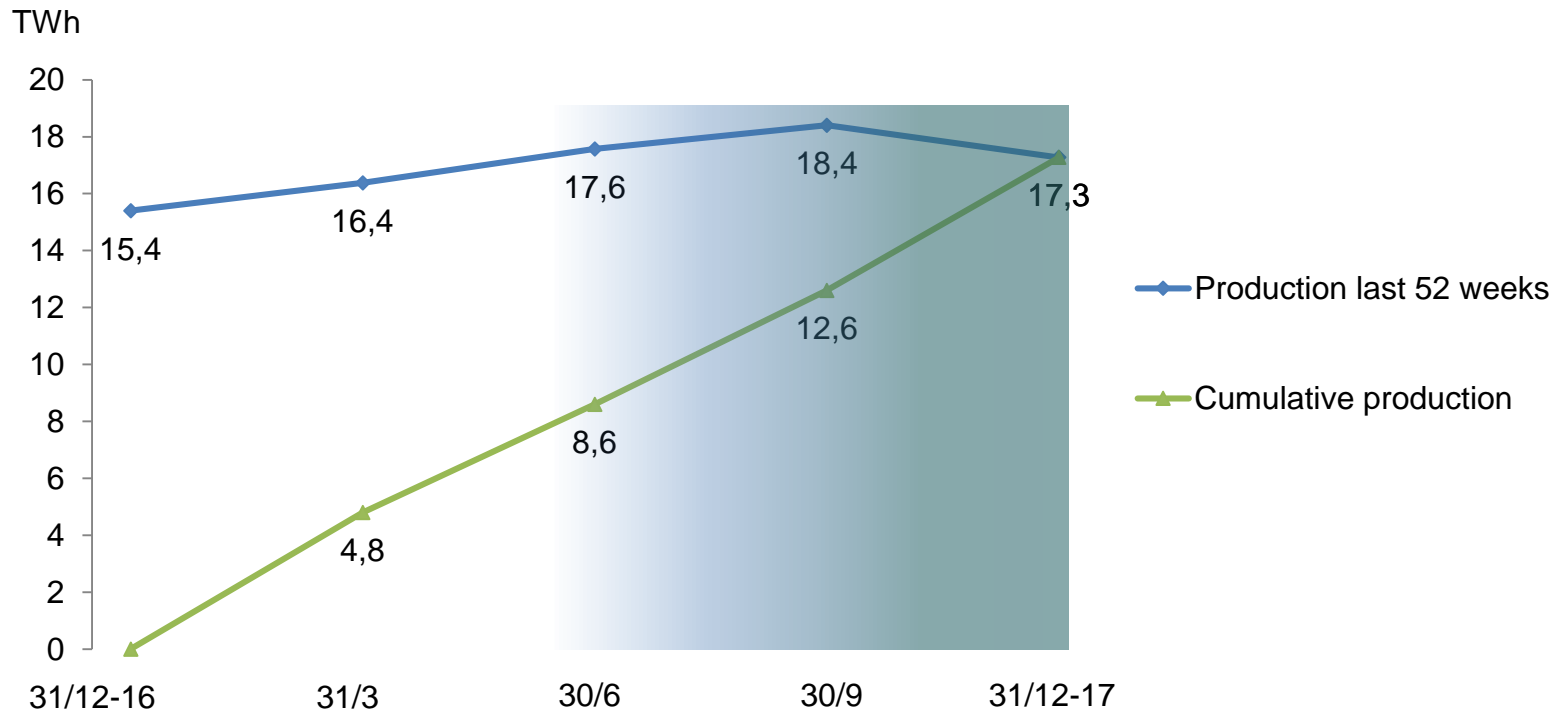

# Installed capacity by price area 2020-12-31 (base case)

# Wind power production 2017 (forecast)

Actual and forecast

# Wind power production – different scenarios

Actual and forecast

As of 31/12

# Base case

This scenario is the most realistic and official forecast of Svensk Vindenergi

## Actual and forecast

As of 31/12

# Assumptions

Part of wind power project portfolio capacity expected to be realized within given time frame depending on scenario (approximate figures)

Status	High	Base **	Low
Under construction	100 %	100 %	95 %
Permitted *	15 %	10 %	0 %
In permission process *	10 %	5 %	0 %

\* Only onshore wind power are expected to be built.

\*\* The base case reflects a possible scenario based on an assessment of current and future market conditions.

# Follow up

Previous forecasts and actual installed wind power capacity

# Follow up

Previous forecasts and actual wind power production
